KNOWS RUBBER

People you can trust with top quality seals, competitive pricing and on-time delivery

TYPES OF SEALING PROFILES

TYPES OF SEALING APPLICATIONS

MATERIALS AVAILABLE

EPDM, Neoprene, Silicone, PVC, Vinyl Nitrile, TPE and TPO

HUNDREDS OF PROFILES

Various sizes and shapes to meet your needs

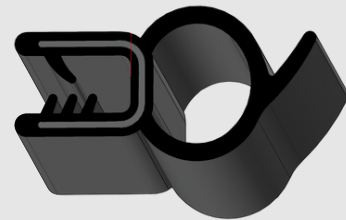

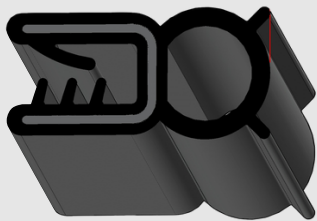

Shown below are examples of our most popular seals.

CLIP-ON BULB SEALS

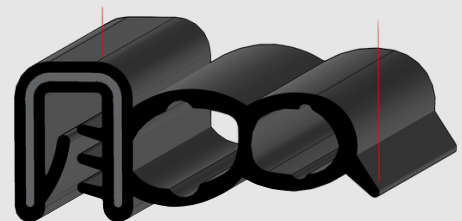

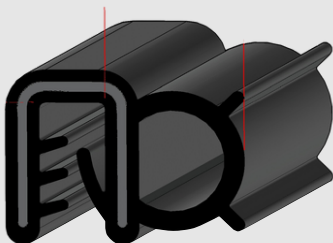

Our Clip-On Bulb Seals can be made with various materials including rubber and plastic.

These seals can be designed with various applications of clip gap widths and bulb heights as needed to provide an acceptable seal.

TOP BULBS

SIDE BULBS

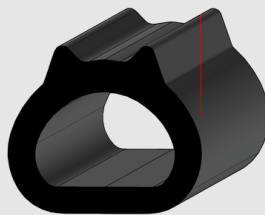

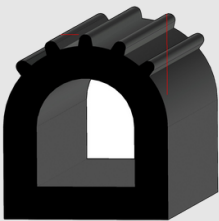

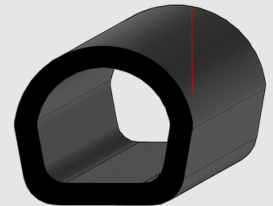

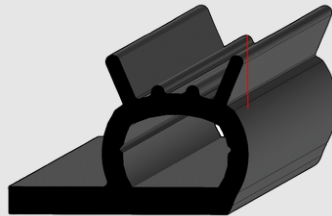

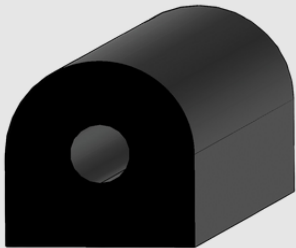

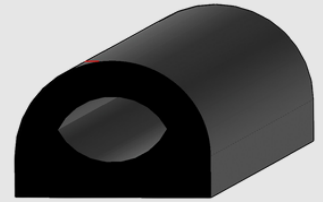

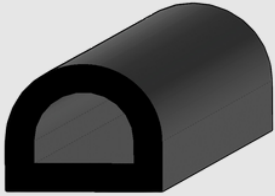

CLIP-ON WIPER

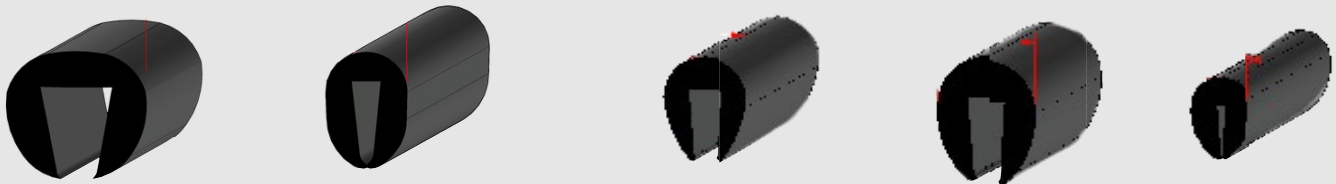

SPONGE RUBBER SEALS

for adhesive (PSA or acrylic) application if needed

EDGE TRIM

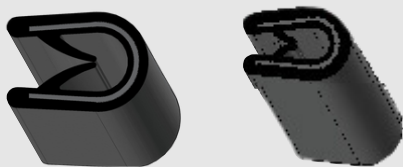

DENSE RUBBER OR PLASTIC • various gap widths

EPDM • with wire carrier

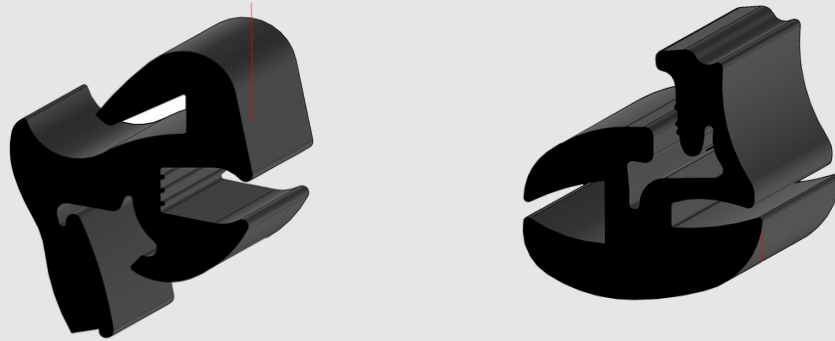

PVC • with wire carrier

SELF-LOCKING WINDOW CHANNELS

Our self-locking channels are made of EPDM dense rubber for fixed window and body applications. We have standard options as shown below, or we can build a custom solution for your application.

DUAL DUROMETER SEALS

Our dual durometer EPDM seals are coextruded with a dense rubber base and a sponge seal. These can be attached in multiple ways, including tape-on, push-in, and slide-in applications.
